**Re: WT Docket No. 06-136
Request for Extension of Time to File Self-Transition
Modification Application for EBS Station WLX891**

Dear Ms. Dortch:

Hastings Catholic Schools (“HCS”) respectfully requests an extension of time, until today, November 17, 2010 to file its modification application notifying the Commission of a transition from the “old band plan to the “new band plan” in BTA 185. The required modification application is being filed simultaneously with this extension request.

On April 20, 2009, HCS filed with the Commission a letter notice of its plan to “self transition” our operations in BTA185, Hastings, Nebraska. While we fully intended to file the required modification application by October 20, 2010, we were unable to make the requisite filing due to an administrative issue involving the password associated with our FRN. There is no indication that any parties to the transition will be prejudiced by the requested extension. A copy of this request for extension is being served on the parties to the transition.

If any further information is needed, please contact me.

Sincerely,

/s/ Father Troy Schweiger
Father Troy Schweiger
Superintendent
